## VGT Valve Grinding Machine

*The latest generation*

- **Easily operated**
- **Self – alignment of valve and seat**
- **Precision grinding**

VGT, the latest generation in the family of high quality tools from **Chris-Marine**

New high precision valve spindle and seat grinding machine for 2 stroke engines, designed to achieve the best grinding result in the minimum possible time.

### Self Alignment of valve and seat

With the unique centering cone system for valve spindle and centering pins for the valve seat, you can achieve fast, easy and accurate mounting of spindle/seat

### Fast and efficient grinding

High power grinding motor with large diameter grinding wheel, for the perfect surface on valve and its seat

### Easily operated

Fixed angle settings for valve and seat, and easily reset if engine builder's requirements change

### Anti Vibration mountings

For use while ship is sailing

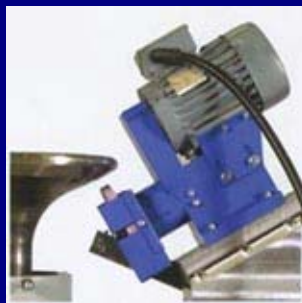

Approved by Man B&W and all major Engine Builders worldwide.

Self – alignment of valve with precision cone system. Support for valve stem correction

Grinding of seat sealing surface to correct angle and profile. Self-aligning for highest precision.

High power grinding motor with large diameter grinding wheel for fast operation

Fixed angle settings for valve and seat. Easily reset if engine builder requirements change.
