Crew Course a success for SRM

This spring has been busy with lots of Crew Courses. We have had several 2-days courses with a mixture of STaR and G3 systems for Brostöm and Andriaki Shipping. We have also had several 1-day training for LNG in Korea and STaR-Training in Poland.

TankRadar training for crews gives the customers confidence and makes their work more efficient and safe. We teach them basic knowledge of the tank radar system and fault finding. We also show them how to make backups of the system and to install the software. We show how easy it is to configure in the workstation and we also teach how to make a backup of the system. They can send it to us, we will change it and send it back to them to install. Our courses appear to be very successful and many come back.

A few comments from the participants:

"Very nice course, with excellent instructors"

"I should have attended this training years ago"

"Good knowledge, nice to get answers to all our questions"

"Thank you very much for all knowledge and advice that you gave me"

"We want to thank you and the Saab Rosemount training center for the hospitality."

FPSO:s – Highly prestigious projects

The large number of FPSO and FSO projects has boosted a demand for Saab Rosemount Marine's tank gauging systems. The latest order is for ConocoPhillips' FSO Belanak. The tanker is being converted at Singapore Technologies. The order is a follow-up to the FPSO serving the Bayu Undan field in the Timor Sea.

Saab Rosemount Marine is also delivering to Berge Enterprise, the Bergensen tanker which is being converted into the world's biggest FPSO with a storage capacity of 2.4 MMbbl.

Another interesting project is the Akpo FPSO to be serving at the Akpo field development. The Akpo field is located 200 kilometres off Nigeria in water depths of 1100 to 1700 metres. The Akpo FPSO is 310 metres long and 61 metres wide and will have a storage capacity of 2 million barrels of oil. It will produce 225 000 barrels of oil per day.

The main Automation Contractor to this project is Emerson. Emerson will be responsible for development, installation, configuration, testing, commissioning of the systems controlling the vessel topsides, hull, Sub Sea and radar tank gauging. Emerson will also be responsible for integrating the safety system.

FPSO:s are highly prestigious projects and Saab Rosemount Marine has now an extensive experience from more than 75 FPSO/FSO units.

Saab TankRadar CTMS onboard 7 out of 10 vessels in the Qatar LNG export program

Right now the sales of CTMS systems for LNG carriers are high. The demand for new LNG carriers is booming and Saab Rosemount Marine has been rewarded a substantial number of orders from major actors in the market.

The biggest LNG export program is the one for Qatar Gas. Many new vessels are needed to cover the need of

transportation. Just recently Daewoo Shipbuilding & Marine Engineering Co. Ltd. (DSME) ordered Saab TankRadar CTMS for three QMAX size vessels. Owner is Qatar Gas.

So far in the Qatar LNG export program Saab Rosemount Marine has received the following orders:

4 CTMS for 209.000 cbm vessels at DSME for Pronav

5 CTMS for 216.000 cbm vessels at DSME for J5

3 CTMS for 265.000 cbm vessels at DSME for QGTC

4 CTMS for 216.000 cbm vessels at Samsung for Teekay

3 CTMS for 265.000 cbm vessels at Samsung for QGTC

In addition to the above we have a Letter of Intent from Samsung for additionally 4 CTMS for QGTC vessels. This means that we have a 70% market share for CTMS in this huge project. There is an expected need of at least 25 additional vessels for the Qatar LNG export program.

STaR Technical Description 6th edition

The 6th edition of Saab TankRadar STaR Technical Description is released. Please note that it is only available as pdf and can be downloaded from the [website](#).

Innovations 2005 -Saab Rosemount TankRadar STaR

Innovations is an annual publication developed by Corporate Technology where Emerson showcases the technology and product achievements of the year including the Technology Award winners, patent recipients, and external award honorees.

This years issue of Innovations magazine feature Saab Rosemount and Saab Rosemount only. With Saab TankRadar STaR as the sole winner of last year's Emerson Technology Award, it will have the honor of having the whole issue of Innovations dedicated to it.
