

A new era will dawn when **SMM 2006** opens on **September 26th** on a new trade fair grounds featuring three new ultra-modern halls. The world shipbuilding market will be presented for four days at the enlarged venue of the New Hamburg Trade Fair. The top event of the maritime sector is expected to attract over 1,500 exhibitors from about 50 countries and every continent as well as approx. 40,000 visitors from all shipbuilding and shipping countries.

The **22nd Shipbuilding, Machinery & Marine Technology, International Trade Fair Hamburg** is attracting more interest from shipyards and suppliers of the international shipbuilding and marine equipment sector than any previous **SMM**. More than 1,500 companies from over 50 countries will present the latest shipbuilding technology under the auspices of the **SMM** at **Hamburg Trade Fair** from **September 26th-29th 2006**.

For executives and experts of shipping and shipbuilding companies, the **SMM** is the ideal venue for making fast comparisons of products and technologies. This event on the Hamburg trade fair grounds offers under one roof future-oriented high tech for all areas of shipbuilding and ship operation – including information and communications technology, control and navigation technology, material and production technologies, CAD, energy generation and automation and propulsion technology. The **SMM** is thus the foremost technology showcase of world shipbuilding.

SMM 2006 will be the world's largest platform for innovative shipbuilding and ship management technology. Improved cost-efficiency, better environmental compatibility and safety are keynotes of the new products and refinements that exhibitors will present at **SMM 2006**. Integration of systems remains a vital topic. This applies for all areas, although the development of automation, navigation and information systems is already well advanced.
